 News was received last week by Mrs. Joe Burton that her father, Rev. Morris is quite ill in a hospital in Cincinnati.
 Mr. Otis Stotts who has been clerking for Mr. Riley Davis has resigned.

Pains and Aches Caused by Kidneys

Many women attribute ailments and suffering to some disease peculiar to their sex, when often the pain and misery is caused by weak or deranged kidneys. Household, office work or factory work may start the trouble, and dizzy spells, puffiness under eyes, sore muscles, stiff joints, discolored or scanty urine, sleep disturbing bladder ailments, rheumatism or diabetes may result.
 When the kidneys are strong and healthy they filter out from the blood the poisonous waste matter. When they are sluggish or overworked they need a medicine to clean them out and invigorate action. Foley Kidney Pills are prepared expressly for the purpose of dissolving all poisonous substances and uric acid that lodge in the joints and muscles and to cleanse and strengthen stopped-up, inactive kidneys. Thousands of men and women in all parts of the country testify to the wonderfully satisfactory results they have had from taking Foley Kidney Pills.

Stormes Drug Store.

Mr. Burley Fothergill will take the position.

Mrs. Robert Long, Misses Francis Long and Valeria Whittaker visited Mesdames B. Ray and J. M. Amos, Wednesday.

Mr. and Mrs. John Land and Miss Lenna Hollon were guests of Mr. and Mrs. Ed Naylor and family on Lexington pike, Wednesday.

Mr. and Mrs. John Land and Miss Lenna Hollon spent Friday with Mr. and Mrs. Thompson Davis and Misses Myrtle and Christine Davis at Buckeye.

The river was frozen over at the ferry so some of the young men crossed on the ice Sunday. This is the first time for more than seven years that this has been possible.

THE RED CROSS.

The local chapter of the Red Cross met Friday in the Odd Fellows rooms where surgical dressings were cut, and rolled and also hospital shirts were cut and sewed. Anyone desiring to make these shirts in their home can have the same by calling for them at the rooms on Friday.

Another shipment of yarn has arrived. Miss Joan Mocht has charge of this department and will wait on any one desiring yarn at the rooms on Fridays.

Do your bit. If you cannot sew at the rooms on Friday call and take the sewing home with you or else do your part by knitting for the boys in the trenches.

It is estimated that some 500,000 persons in France are afflicted with tuberculosis as a direct result of the war. Efforts to control this spread of the malady are not only of supreme concern to France herself, but are of great importance in making France healthful for our own troops. The American Red Cross is co-operating with the Rockefeller Foundation in financing a commission for the prevention of tuberculosis.

Wounds were being dressed with sawdust in Rumania when the Red Cross Commission to that country arrived there. Upon recommendation of the commission medicines, surgical instruments, hospital supplies, bandages, bed linen, collodion, wax paper and iodine were shipped by the Red Cross to Rumania. There was also appropriated by the Red Cross \$1,518,000 for work in Rumania.

Since the outbreak of the war the American Red Cross has organized forty-nine hospital units, fourteen of which are already on duty in France. In addition the Red Cross has organized eight naval station hospital units. One of these is now in service and three others have just been mobilized. The

poilus come out of the trenches, to go home on leave, mud-stained and reeking with vermin. In that condition they are marched to the nearest railroad stop, where the American Red Cross is now establishing shower baths, laundries and mending and disinfecting rooms. There will be rest rooms with books, writing materials and games. Some of the stations will have dormitories and lunchrooms.

There are 20,000 children in France, at the present time, receiving American Red Cross assistance, according to a cablegram just received from the Paris headquarters of the Red Cross. Complete medical care is being extended to 700 of this army of children while dispensary medical care claims 3,000 patients. Orphans and other children who are aided by the Red Cross directly or indirectly, number 20,000. Five hundred children per day, for instance, receive medical attention at Evian, the point of repatriation for nationals of France who are being returned from behind the German lines.

The relief of suffering among children with the care and education of destitute children, embraces one of the principal activities of the American Red Cross abroad. At one point in the war zone in France a children's refuge and hospital has been opened, where several hundred children have been gathered together just to keep them out of danger of gas and shell fire. At another point among the wrecked villages there is a medical center and a traveling dispensary sufficient to look after 200 children.

A MERCILESS JUDGE One Who Shows No Favor.

A merciless judge is Father Time. Before him the weak and the wanting go to the wall. Only the truth can stand. For years the following statement from a Lancaster resident has withstood this sternest of all tests.

Mrs. B. F. Walter, Hill Terrace, Lancaster, says: "I never fail to praise Doan's Kidney Pills, for they are a most worthy remedy and have done me much good on many occasions. For several years, I have suffered from a lame and painful back. My kidneys have also been irregular in action. Doan's Kidney Pills have always removed every symptom of kidney trouble at these times." (Statement given March 20, 1908)

ALWAYS RELIABLE.

On November 18, 1916 Mrs. Walter said: "I have the greatest confidence in Doan's Kidney Pills. I was free from kidney trouble for a long time, but recently had a slight attack. I again used Doan's Kidney Pills and they relieved me."

"MADE IN AMERICA".

That some good is to result in this World's War is certain. Just how much good and how lasting it is up to our country to determine.

There is always a period of reconstruction that follows in the wake of a great turmoil and conflict—when business and society have to re-adjust themselves to meet the new conditions brought about by the change in affairs. America has been brought to see and feel her own deficiencies. She has been a nation of consumers, depending largely on importation for many articles of manufacture. Foreign countries by their constant advertising have persuaded the people that their goods are superior to those produced at home. Now with the closing of the world's mart America is thrown on her own resources and in addition to having to live down this old impression has to build up a reputation for herself. Before the war Germany was in control of the dyeing business of the world, producing eighty-five per cent of the world's consumption. When this was cut off America had to learn the business that she should already have had control of. Now the demands are being met and fast colors are being produced that meet the demand of the consumer. America will learn a lesson of thrift and industry if her people will stand by her and demand "Made in America" goods.

Songs of the Heart.

The finest music of the greatest orchestra on earth cannot help a heart along to happiness as the songs do that the heart sings to itself—songs of cheer, of patience, of trust, of unselfish love. These make the melody of life, and grow stronger and sweeter by practice year by year.—Exchange.

To Mend Marble Ornaments.

To mend marble ornaments, plaster of Paris, finely powdered, is soaked in as much saturated solution of alum as it will absorb. The mixture is baked in a slow oven, and when hard it is ground to a powder. This powder, mixed in water and applied like plaster, sets very hard, will take a very good polish, and, if properly colored, makes a capital imitation of any kind of marble.

Acids Endanger Ships.

Shipmasters dislike carrying drums of acid where they cannot be reached readily. A Chilean ship, the Japan Advertiser says, recently put in at the Falkland Islands leaking badly. Her cargo was made up of drums of acid and chalk. The acid had leaked from the drums and mixed with the chalk, forming carbonic acid gas in the hold. This gas is deadly and the crew could not make repairs. Meantime the acid had gathered at the bottom of the hold and eaten away the iron frames of the ship.
